| Experience                         | Minimum of 3+ years of working experience as a Full Stack developer (JAVA).<br><br>Desirable:<br>i. Microservices Architecture: Experience with microservices architecture and containerization technologies (e.g., Docker).<br>ii. Cloud Platforms: Familiarity with cloud platforms such as AWS, Azure, or Google Cloud.<br>iii. Testing Frameworks: Knowledge of testing frameworks and methodologies for backend applications (e.g., JUnit, Mockito). |

|                      |  |
|----------------------|--|
|                      | <ul style="list-style-type: none"><li>iv. Knowledge of frontend technologies i.e. HTML, CSS, Javascript</li><li>v. Knowledge of AI/ML, Blockchain</li><li>vi. Experience with build tools and task runners (e.g., Webpack, Gulp, npm).</li><li>vii. Knowledge of UI/UX design principles and best practices.</li><li>viii. Experience with CSS preprocessors (e.g., Sass, Less).</li></ul>   |
| Key Responsibilities | <ul style="list-style-type: none"><li>i. Develop &amp; Maintain Web Application: Design, implement, and maintain server-side applications/web applications using Java, ensuring high performance, scalability, and reliability. Build responsive, user-friendly web applications and features using modern frontend technologies (HTML, CSS, JavaScript, React etc.).</li><li>ii. Database Management: Work with open-source databases (e.g., MySQL, PostgreSQL, MongoDB) to design schemas, write efficient queries, and optimize performance.</li><li>iii. API Design: Develop and integrate RESTful APIs to support frontend functionality and third-party integrations.</li><li>iv. Troubleshooting: Identify and resolve technical issues, bugs, and performance bottlenecks in the backend systems.</li><li>v. Documentation: Maintain comprehensive documentation for code, APIs, and system architectures.</li></ul> |
| Technical Skill Set  | <ul style="list-style-type: none"><li>i. Proficiency in Java: Strong experience with Java programming, including familiarity with frameworks like Spring Boot, Hibernate.</li><li>ii. Proficiency in Front-end: HTML, CSS, and JavaScript. Experience with modern JavaScript frameworks/libraries (e.g., front end React/Next.js, Node.js).</li><li>iii. Backend Development Experience: Demonstrated experience in backend logic development and architectural design.</li><li>iv. Database Knowledge: Hands-on experience with open-source databases such as MySQL, PostgreSQL, or similar, including schema design and optimization.</li><li>v. API Development: Experience in designing and implementing RESTful APIs and asynchronous programming.</li><li>vi. Version Control: Familiarity with version control</li></ul>  |

217/c

|  |   |
|--|---|
|  | <p>systems such as Git.</p> <p>vii. Problem solving Skill: Should aware of Advance Data structure</p> <p>viii. Responsive Design: Strong understanding of responsive design principles and cross-browser compatibility</p>  |
| Remuneration   | Rs. 67,000/- per month (Consolidated)<br>No other allowances paid.  |
| <b>"Period of engagement":</b> : One year initially and can be extended for another year based on performance. |   |
| <b>MOBILE APPLICATION DEVELOPER</b>  |   |
| Vacancy  | 01  |
| Qualification  | First Class in BE/B.Tech./M.Tech./MCA in CSE/IT or related branch from recognized university.   |
| Experience   | <p>Minimum of 3+ years of professional experience in Flutter, Dart and Android Studio, RESTful APIs to connect mobile applications to back-end services. Experience in building multi-platform applications for Android and iOS platform using the Flutter development framework.</p> <p>Desirable:</p> <ul style="list-style-type: none"><li>i. Dart, Flutter, iOS, Android, Git</li><li>ii. Knowledge of asynchronous programming and concurrency handling.</li></ul>   |
| Key Responsibilities   | <ul style="list-style-type: none"><li>i. Develop and Maintain Applications: Design, develop, and maintain high-quality Android applications and iOS Application using flutter ensuring a seamless user experience.</li><li>ii. Troubleshooting and Debugging: Identify, troubleshoot and resolve issues/bugs in applications, ensuring optimal performance and reliability.</li><li>iii. User Experience: Implement features that enhance the usability and functionality of applications while maintaining a focus on user experience.</li></ul> |
| Technical Skill Set  | <ul style="list-style-type: none"><li>i. Technical Skills: Proficiency in Flutter and Dart for cross platform app development. Good to have proficiency in Kotlin and Swift(Xcode IDE) for better integration in app development.</li><li>ii. Architecture: Experience with architectural patterns such as MVVM, MVP, or Clean Architecture.</li><li>iii. APIs: Strong experience in integrating RESTful</li></ul>  |

216/c

|  |   |
|--|---|
|  | <p>APIs, Firebase integration and third-party libraries.</p> <p>iv. UI/UX: Experience in designing and implementing responsive UI/UX, adhering to Android design guidelines.</p> <p>v. Testing: Familiarity with testing frameworks such as JUnit, Espresso, and experience in writing unit and integration tests.</p> <p>vi. Version Control: Proficient in using Git, SVN and other version control systems.</p> <p>vii. Experience with Firebase integration or other cloud-based solutions.</p> |
| Remuneration   | Rs. 67,000/- per month (Consolidated)<br>No other allowances paid.  |
| <p><u>"Period of engagement:</u> One year initially and can be extended for another year based on performance.</p> |   |

**Instruction for candidates:-** Interested candidates can see the details at <http://www.degs.org.in>. The candidate must apply on the link given are <http://www.degs.org.in>. Last date of sending application is 17/11/2024. The applications received will be verified and the shortlisted candidates qualifying the criteria will be called for the interview. Based on the interview, the candidates will be considered for the recruitment against various posts.

  
Director(DeGS)
